Subject: Proposed Microsoft settlement

I am opposed to the current settlement as outlined currently.
Microsoft is not a benign monopoly. They use their clout to drive out competition. The control of the source code for their operating system, and the rules and regulations in place to developers, gives Microsoft prior knowledge of cutting edge technology whic they can and do use to curtail competition.

I strongly belive Microsoft must be punished along the outline originally set forth by Judge Jackson.

Sincerely,

Marc S Jacobson
